

Manned Model Course

3-day “Advanced Ship Handling”

Participants will hone their ship handling skills on topics including anchoring, docking, undocking, slow speed maneuvering, experiment with movement of the pivot point, advance and transfer, passing in narrow channels, shallow water effect, wind effect, thruster work, effective use of tugboats and much more.

The manned model center uses ship models like those that transit the new Neopanamax locks today, including bulk carriers, tankers, container ships, and LNG vessels.

▶ **Duration:**
32 hours (3 days).

▶ **Price:**
B/. 4,560.00 per person
