

Advisory To Shipping No. A-36-2024

September 24, 2024

TO: All Shipping Agents, Owners, and Operators
SUBJECT: New Maritime Services Tariffs section and Calculator

The Panama Canal is pleased to announce the launching of the renewed Maritime Services Tariffs section on our website, <https://pancanal.com/tarifas-maritimas/>. This section provides updated and detailed information about our toll rates and maritime services, to ensure continuous and transparent communication with our customers, as well as the general public.

Information about rates, can be found in the following blocks:

- Tariffs List: Current tariffs for tolls and maritime services, available in a downloadable format and a drop-down list to facilitate searching.
- Maritime Services Estimation Calculator: Provides an estimated cost of a transit through the Canal, including the toll tariff, with its fixed and variable components, and maritime services. Furthermore, it includes the estimated cost for port movements.
- Advisories to Shipping (filtered): Includes various announcements related to tolls and maritime services tariffs.
- Notes on Maritime Services Tariffs: Contains explanatory notes and examples related to tolls and maritime services tariffs.
- Frequently Asked Questions about maritime services

This calculator is designed to estimate the costs of maritime services in a simple way. It does not require much information to obtain an estimate and considers a typical vessel based on size category and market segment. However, it does not replace the VUMPA calculator, which provides a more detailed estimate of the Panama Canal's maritime services.

For additional information, please contact: operationservices@pancanal.com
